Session 3.2.4.

Role of Basin Organisations in promoting management and restoration of ecosystems

Daegu
15 April 2015

Daniel VALENSUELA - INBO
Knowledge of the Basin ...

- Basin Organizations are developing Water Information System, base for Basin Management
- WIS must address not only water resources, water uses, impacting sectors but also status, quality, degradation of aquatic ecosystems
- In developing knowledge bases at basin level, BO:
  - Supports knowledge development about ecosystems
  - Helps defining priority areas
  - Play a role of expert close to decision makers
Basin Management Planning ...

- BO needs first a Strategy: include strategic orientations related to ecosystem conservation, management
- BO in charge of developing Basin River Management Plan and Programme of Measures
- Introduce in those instruments Actions and measures to protect and restore the ecosystems
- Everything done in line with the 2 other pillars of SD: Economic & Social
Participation ...

- Basin Organization is a way for more participation thanks to the Basin Commission.
- Basin Commission has to take on board NGOs, Environmentalists, Biologists, experts on ecology, biodiversity, civil society ...
- Local commissions, working groups, are also place for participation of all representatives, including “environment”: give voice to “environment” as one stakeholder.
- Basin Commission and other groups allow debate to convince the members (win - win, benefits to economic sectors).
Financing ...

- Basin Organization play a role in financing water (charges, taxes, redevances ...)
- Role to mobilise funding (transboundary)
- Part of funding has to be used according to the plan, for ecosystem protection & restoration
- Role of BO in collecting taxes/charges for protection of aquatic ecosystems + environment service payment
Handbook on Ecosystem and Basin

THE HANDBOOK FOR MANAGEMENT AND RESTORATION OF AQUATIC ECOSYSTEMS IN RIVER AND LAKE BASINS
