

D - 3 World Water Forum

INBO, strategic partner of this 9th edition, will meet you in Dakar!

#IWRM #Catchments #Groundwater #Cross-borderCooperation #ClimateChange #Governance #WaterSafety
#Data #Peace #Training #SustainableWater #Sanitation #SDG #SustainableDevelopment #Sharing #NBS

The International Network of Basin Organizations (INBO), which has been leading ambitious actions for the joint and sustainable management of water resources at the basin level for 30 years, will organize and participate in more than 20 exchange sessions on IWRM at the level of basins, cooperation, water data sharing and adaptation to climate change.

"I applaud the mobilization of INBO and its members to make the voice of basin organizations heard during this unavoidable world meeting on water security for all. In a context of climate change, it was crucial for INBO to highlight the analyses and solutions we provide on related topics such as peace, green finance, cooperation, knowledge sharing, innovation, NBS, etc."
Eric TARDIEU, INBO Secretary General.

9th WORLD WATER
FORUM | DAKAR 2022

General Programme

For the first time in the history of the Forums, Dakar included a political segment dedicated to basin organizations. With its partners, OMVS, OMVG, UNECE and the Swiss Government, INBO was in charge of the organization, animation and management of this segment.

The United Nations, the European Union, the World Bank, international basin networks and government representatives will meet on Thursday 24 March (Oval Room) to exchange on the strengthening of the basin management model. This segment will also be the occasion to assess the achievement of the dedicated targets (6.5.1 and 6.5.2) of the Sustainable Development Goal (SDG) n°6, for clean water and sanitation.

Basin Segment Programme

On Wednesday 23 March, INBO members and partners will mobilize around the high-level panel on water and ecological security, in particular with the call for signing the Declaration:

"No water security without ecological security,
No ecological security without water security".

Each signatory commits to work towards "a better integration of ecosystems and biodiversity in water sector activities".

To know more about
the Declaration

Within the basin segment, INBO members and partners will also adopt the "Dakar Action Plan for the basins of lakes, rivers and aquifers".

It aims at mobilizing the main stakeholders in basin management (basin organizations and committees, ministries, donors, water users' associations, etc.) in order to accelerate the achievement of the SDGs by strengthening cooperation, planning, the legal and institutional framework of the basin organizations or by seeking innovative financing.

To know more about
the Action Plan

The members of INBO delegation present in Dakar during the Forum remain at your disposal for any questions and meetings, or in France after the Forum.

International Network of Basin Organizations (INBO)

Created in 1994, INBO is a non-profit association under French law. This platform for exchanging knowledge and experience has 192 Member-Organizations (basin organizations, governmental administrations in charge of water, bi or multilateral cooperation organizations) and Permanent Observers, present in nearly 90 countries.

International Office for Water (OiEau)

OiEau is an association under French law, created in 1991 and recognised as a public utility. Its main objective is to develop skills for better water management at all scales, and it puts its 4 fields of expertise (Support & Cooperation, Training & Educational Engineering, Data & Information Systems, Coordination of stakeholders' networks) at the service of various customers and partners (local authorities, consulting firms, EPCI, etc.). OiEau is INBO's Permanent Technical Secretariat.
