

Group 3 reporting:

Transboundary basin adaptation and climate finance

- **Cooperation between ministries** in charge of the technical and financial aspects of projects submission is **challenging**,
- **Transboundary** nature of TBOs of such projects brings **complexity** (political trust and administrative; e.g. MRC vs LMC),
- “**Small**” projects, “small” amounts, **little interest** for the donors.
- **Accreditations** to climate finance donors AND development of proposals: **lengthy, complex**, results **uncertain**.
- Impossible debate to distinguish **additionality** and **development**
- What’s in it for MS to leave it to the TBO to submit project proposals?

Group 3 reporting:

Transboundary basin adaptation and climate finance

- **Streamlining** climate in all the TBO activities (even thus not budgeted for climate)
- **Aligning with donors** priorities (nexus, adaptation and mitigation, biodiversity & climate)
- Technical assistance for project development (**publication, incubation**)
- Pioneers spirit... And advocacy work towards donors.
